

MOBILE ALL TERRAIN EXCAVATING

M/s Menzi Muck, Switzerland - world renowned manufacturers of Mobile All Terrain Excavators together with Kam-Avida and its 20 years of experience in India, bring to you the Kam-Mate in models of varying capacities and attachments, the M5 20, M5 40 and M5 45. We are delighted to present to you an engineering marvel that will start work where a conventional excavator, back hoe loader will fail to even reach.

We start to work where others stop Meaning: if the ground is uneven, unstable or if the location is inaccessible and conventional methods of earth, silt and debris removal fail, our all terrain machine – the KAM-MATE will find its way to the spot and perform its tasks to its optimal levels.

The KAM-MATE M5 40 and KAM-MATE M5 20 may be used for the below applications:

- De-silting of inaccessible Open Nallahs and Drains
- Dredging of Canals & Shallow Water Bodies
- River Bank Reinforcement
- Stream and Canal Restoration
- Land Slide Restoration and Protection
- Disaster Management
- Border Road Construction

The KAM-MATE M5 45 may be used for the below applications:

- Maintenance of Assets that are along the Railway Track but are difficult to access.
- De-silting of Open Nallahs and Drains along the Tracks.
- Maintenance of Fixtures and Bridges along the Tracks.
- Reaching a point of mishap during Rescue Operations.
