

EXCAVATING AND DREDGING

M/s REMU, Finland - manufacturers of Amphibian Excavating and Dredging Equipment together with Kam-Avida and its 20 years of experience in India, bring to you the Kam-Dredger Big Float in models in varying capacities, the E 22 EP, E 14 EP and E 8 EP. We are delighted to present to you a machine that will guarantee accessibility through water bodies ; a machine not deterred by solid land, shore lines, swamp or water.

An excavating arm fitted on an undercarriage or Pontoon ensures our machine has superior reach and balance.

Our machine may be used for the below applications:

- Digging Dredging and Suction Dredging.
- Dredging intake channels and reservoirs in Hydroelectric Power Plants.
- Cutting Aquatic Vegetation and Bushes from Water-Sides.
- Stream and Canal Cleaning Restoration.
